

# CEMJazz2 Data Base Query

**Query B2 V 1.0 (stable)**

Ultraphone SU 5018

infos This new version favors full-text search. You can directly query a series (audio, films and videos, scores, *etc.*) and of course refine your search by selecting more precisely the collections or fields to query.

- A keyword is required unless, while refining, a drop-down list is proposed (record label, magazine title, *etc.*).
- Research is carried out in temporary workspaces. To save the results, you must use the “save as pdf” button on the right-hand side of the pages.
- The return page can be the result of multiple SQL queries. Each is limited to 50 responses except for users connected to the site.
